Once erected, it is driven to a permanent location, usually on land or on a platform at a construction site. Generally, this location must be in close proximity to utilities, and it must be situated in a location that makes it convenient to the majority of potential buyers. These factors make mobile homes one of the more affordable housing options available. Mobile homes are similar to traditional houses in many ways. They have four walls, a roof, and a floor. However, most of them do not have a basement, or in some cases, a foundation at all. The mobile home is mounted on wheels on a single axle with no hitch, and is driven into a permanent foundation. Until the 1980s, most mobile homes had no air conditioning, and were basically windowless boxes. In the 1980s, manufacturers began to introduce modular design. Modern modular mobile homes are available in various sizes, shapes, and styles. The basic structural materials used in their construction are steel and concrete. The building methods used include a combination of sheet metal and glazing techniques, and prefabricated and conventional framing. Building techniques used to construct a mobile home vary with the size, purpose, and configuration of the dwelling. For example, a doublewide mobile home is generally produced using standard framing techniques. On the other hand, a doublewide mobile home with built-in design features would be constructed using unique framing methods. Types of mobile homes

FRESHMAN STUDENTS FROM SCO (HONORS) STUDENT PROFILE: Mark M. Davis, '14, was awarded a LIFT Scholarship for his in-depth research and projects. Read more about this selected student and his selection process. Photo by: Mark M. Davis. DAILY FREE STAND LIFE: ALEXANDER C. HENDERSON, SCO (HONORS) STUDENT PROFILE: Alexander C. Henderson, '14, was awarded a LIFT Scholarship for his in-depth research and projects. Read more about this selected student and his selection process. Photo by: Arthur M. Frangipane. ASSOCIATE FELLOWS: THE HOPE OF OCCT is closely associated with the faculty, the Undergraduate Teaching Fellows, and the University of Southern California, Los Angeles. We recognize the crucial role that the Faculty members play in the undergraduate experience at USC. This year, 39 USC teaching faculty members were nominated by the USC faculty, who can have only five to ten nominees each year. The University of Southern California is a nationally ranked research university 82157476af
