Great story  
8/10

Or watch it on otakustream.tv. Love the art style. Big anime fan. But that is where the game seems to run a bit short. Combat is slow and unresponsive. I had times where I clicked my mouse to attack and nothing happen. Then jumping felt like a game of chance everytime I tried to clear one area to the next. Music glitched out for entire first area just the sound of jumping and getting hit. Death comes quick as you only get a few hits. By the time I reached the boss of what I think is first area. Rage mode was engaged. Lvl up's aren't explained so had no idea if I could power up or what? Then couldn't even find a menu to try and set up controller over keyboard. For those reason just wasn't something I could really keep trying. But the art style leads me to hope in the future they will fix these things. Cute graphics, story, music, characters and dialogues.

I loved Memoranda so much. I don't like puzzle games actually but Memoranda is different. This game is really immersive. But I'm sad 'cause this game is underrated, I think it should be more known. Anyway, I won't talk about story, you should play and learn it! Have fun everyone.. I wanted to like this game, but I feel it really needs some polish to be good. Conceptually, the game presents a neat world with a lot of potential for a good and intriguing story, however it's execution leaves something to be desired. As a puzzle-platformer, the movement mechanics are not as solid as they should be, which can lead to frustrating missed jumps and having to restart levels or segments again. The puzzles while the core mechanic are often repetative and sometimes more trial and error than actually intuitive. Because of the trial and error and poor control, the first "boss" was less an exciting experience and more a dull trudge of figuring out what to do and restarting over and over at checkpoints. Other complains are more quality of life issues, such as the loading times, but also by design your character warps back in time to an established checkpoint but if you die by falling into a pit (which will happen) if you are unable to warp back in time the whole level has to be replayed, which can be monotonous since you have to do all the required actions of setting up clones, but then also waiting for those clones to complete their required actions.

TLDR it's a game I wanted to like, but I just can't get behind.. While I wouldn't personally recommend this, it's got some things going for it. It does a good job of blending in the RPG elements with the sandbox gameplay while still giving you absolute freedom. Took me a few tries to figure out what the hell was going on but once you start slapping on weapons, upgrades, jet packs, and grappling hooks you can enjoy yourself.

Maybe it's more to your taste than it is to mine. It's got Trading Cards so may be worth checking out if you're curious and it's on sale.

This is a great game with great art. A little buggy at times but once you get past that, you can see the real charm it has.. Best game ever, in it's time.. This game is super fun to play with one or two hands, it's like MOW but HD graphics with a lot of polygons that turn Sherman into Abrams! ... ^^ Now with MOW mod you can literally play MOW entries game but CTA gameplay for TPS\FPS style. The effort the developer put into this is truly insane! Great work!. I been check my career there nothing download? I be download done try get in nothing in career!. Played through, Didn't Enjoy.
